

Seminar on

“Legal Aspects of Bills of Quantities and Standard Method of Measurement”

(Co-organised with HKIE for CPD)

Successfully Held on 11 October 2019

The bills of quantities form an essential component of a construction contract, which provides a list of quantified items of work required for the completion of construction works with the quantities of the work stated in appropriate units of measurement for work. They are in the daily uses but the legal issues surrounding them are not necessarily fully appreciated. This seminar provides the legal concepts of bills of quantities in construction works. By reviewing recent representative cases, it equips participants with the necessary knowledge and practical understanding for managing bills of quantities in their work environment.

The Seminar on “Legal Aspects of Bills of Quantities and Standard Method of Measurement” was successfully held on 11 October 2019. Feedbacks are very positive. The visiting lecturer was **Mr. Honic Ip, Barrister-at-Law**.
